

Doolittle: Aerospace Visionary (New edition)

Filesize: 2.07 MB

Reviews

It is a single of the best book. This is for those who statte there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
(Dr. Barney Robel Jr.)

Potomac Books Inc. Paperback. Book Condition: new. BRAND NEW, Doolittle: Aerospace Visionary (New edition), Dik Alan Daso, On April 18, 1942, Lt. Col. Jimmy Doolittle led a flight of sixteen B-25 bombers off the flight deck of the USS Hornet on one of the most daring raids in U.S. military history, a low-level strike on Tokyo and other Japanese cities. For this heroic act, he received the Medal of Honor. But, as Dik Alan Daso convincingly argues, James H. Doolittle should be remembered as much more than a famous combat pilot. With a doctorate in aeronautics from MIT, he devoted his life to mastering the technical and practical intricacies of the most amazing new invention of his time, the airplane. In 1922, Doolittle became the first person to complete a transcontinental flight across the United States in a single twenty-four-hour period. Later he worked with the Shell Oil Company to develop high-octane aviation fuel to enhance aircraft performance. He also won numerous trophies for his record-breaking high-speed flights, and he developed new instrumentation to assist pilots when flying "blind" in poor weather. In jet age parlance, Doolittle constantly "pushed the envelope." After holding several major combat commands during World War II, he was appointed a special assistant to the Air Force chief of staff in 1951, serving as a civilian adviser in scientific matters, including the development of ballistic missiles and the fledgling space program. From the early days of aviation to the space age, Daso not only provides a concise but expansive overview of the rapidly developing field of aviation, but also chronicles a pioneer's tireless efforts to be a visionary for the new era.
