Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

RareBooksClub. Paperback. Book Condition: New. Paperback. 80 pages. OCLC Number: 52400884 Excerpt: . . . 1. Introduction Multidisciplinary optimization provides a means to integrate two or more design disciplines under the same optimization umbrella. The design discourse includes all design parameters concurrently. This allows a means of determining the tradeoffs between design parameters in the constituent design disciplines. Furthermore, the design parameters are varied until they satisfy a particular performance criteria 1-8 . Hence, system level performance objectives and constraints can be achieved. This paper presents a procedure for performing multidisciplinary optimization using the Internet and UNIX commands. The paper illustrates the design procedure on a spacecraft design problem that involves the disciplines of attitude control system design and structural design. Performing multidisciplinary optimization via the Internet has many advantages. Ref. 7 (Messac et al) has demonstrated that multidisciplinary design and optimization has matured beyond the research domain to industrial use. Messac has demonstrated a more general approach to multidisciplinary design by implementing the design with commercial software packages. The goal of this research effort has been to extend multidisciplinary design and optimization such that it is amenable to design and development teams whose members and respective expertise and software are not geographically located together. The Internet provides a means of communication, transfer of data and transfer of process control. The advantage of such an approach is that it allows for more efficiency and economy. For example, this approach does not require that one design software package reside on a particular mainframe computer simply because the other software is there or putting the more computationally intensive software on a less computationally effective machine because other necessary design software is on the machine. Because software license costs are dependent upon the machine . . . This item ships from...
