The greatest depth it is practicable to blast at one shot is about 6 feet. If a deeper ditch is wanted, blast a second time in the bottom of the first excavation. (See table on page 98 for depths for charges.) The blasting out of very large canals should proceed along these lines. They involve no principles not explained for the making of small ditches. A channel 35 feet wide and 6 feet deep that was excavated by blasting. The water has smoothed the sides a little, but in the main the big)ditch looks in the picture as it looked after the blast which opened it. The cost of such ditching can e figured accurately in advance when dimensions are known, the kind of soil and its...
