One of the primary goals of strength training is to make a person strong enough to withstand high levels of competition and enhance his/her level of confidence. A plentiful amount of commitment can make a person jump higher, run swifter, and swim faster. This type of training can be done in a lot of ways, either in the form of a group, or individually, or setting time limits. A person usually starts out with lower weights in combination with high repetitions, then with the passage of time, advances to higher weights with lower repetitions.
