

A Treatise on the Sun's Radiation and Other Solar Phenomena: In Continuation of the Meteorological Treatise on Atmospheric Circulation and Radiation, 1915 (Classic Reprint) (Paperback)

Filesize: 4.51 MB

Reviews

This publication is wonderful. I have got study and so I am confident that I am going to likely to read once again once more down the road. Its been designed in an exceedingly straightforward way which is only soon after I finished reading this ebook by which actually altered me, change the way I think. (Woodrow Labadie)

A TREATISE ON THE SUN S RADIATION AND OTHER SOLAR PHENOMENA: IN CONTINUATION OF THE METEOROLOGICAL TREATISE ON ATMOSPHERIC CIRCULATION AND RADIATION, 1915 (CLASSIC REPRINT) (PAPERBACK)

To read **A Treatise on the Sun s Radiation and Other Solar Phenomena: In Continuation of the Meteorological Treatise on Atmospheric Circulation and Radiation, 1915 (Classic Reprint) (Paperback)** PDF, you should access the button beneath and download the ebook or have accessibility to other information which might be have conjunction with **A TREATISE ON THE SUN S RADIATION AND OTHER SOLAR PHENOMENA: IN CONTINUATION OF THE METEOROLOGICAL TREATISE ON ATMOSPHERIC CIRCULATION AND RADIATION, 1915 (CLASSIC REPRINT) (PAPERBACK)** ebook.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on the Sun s Radiation and Other Solar Phenomena: In Continuation of the Meteorological Treatise on Atmospheric Circulation and Radiation, 1915 There are two fundamental problems in solar physics that need an immediate solution: (1) the nature of the solar radiation, whether it is black or gray, that is, whether it has full or imperfect efficiency, together with its amount at the sun, and in the different layers of the earths atmosphere; (2) the physical conditions at which this radiation generates, and the pressures, temperatures, densities, and gas efficiencies that are concerned with the observed phenomena in the solar spectra. It has been found that the system of non-adiabatic meteorology, which was explained in the Author s Treatise on Atmospheric Circulation and Radiation becomes equally applicable in the solar atmospheres by means of a simple transformation. These terms have been computed for several monatomic gases, by the method of trials, and the results are not only instructive in many directions, but they are in complete harmony with the observations made with the spectro-heliograph and the spectro-bolometer. The radiation is black at 5.85 gram calories per square centimeter per minute, when reduced to the equivalent at the distance of the earth; it loses 1.87 calories in the hemispherical non-adiabatic shell of the sun, and is effective on the outside of the earth s atmosphere at 3.98 calories; the course of its depletion is measured by the bolometer to 2.47 calories at the sea level. This conforms with the thermodynamic conditions of the two atmospheres. The pyrheliometer fails to record three important depletions, and it, therefore, cannot account for more than 1.94 calories by the...
